

# Physics

## Research Experience for Undergraduates

At the University of Illinois at Urbana-Champaign

May 27 — August 1, 2014

### Highlights

- Research strategy “Boot Camp”
- Weekly seminars, student & faculty talks and discussions.
- Graduate school Workshop.
- Fermi National Accelerator Lab field trip.
- Social Activities

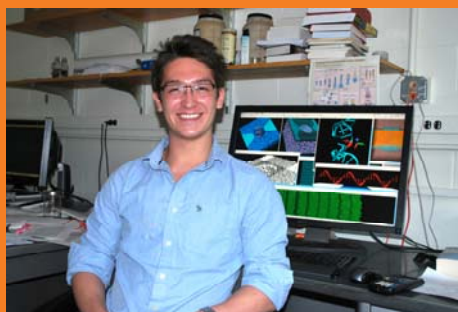

REU Group Summer 2013

### Research Areas

- AMO/Quantum Physics
- Astrophysics/Cosmology
- Biological Physics
- Condensed Matter Physics
- High Energy Physics
- Nuclear Physics
- Physics Education
- Physics of Music

### Application Deadline

February 14, 2014

### Program Dates

May 27-August 1, 2014

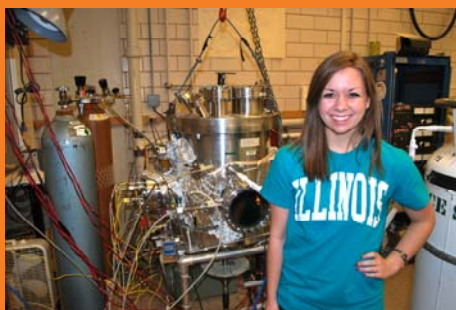

Contact Toni Pitts at

### Program Details

Our ten-week program provides an intro to a broad range of problems in science and engineering using the tools of physics. You will collaborate with a faculty adviser and graduate students.

Competitive stipend, furnished apartment within walking distance to Loomis; travel reimbursements are provided. To apply complete the online application, with three letters of recommendation and mail an official transcript.

*The University of Illinois REU program is specifically for students who have completed their sophomore or junior year in physics. Women, underrepresented minorities, and students from colleges and universities without significant research opportunities are encouraged to apply.*

Sponsored by the  
National Science  
Foundation
