Thursday, February 4

Engineering Graduate Students

12:00pm – 1:00pm and 4:00pm – 5:00 pm

Please join some of Sandia's University of Illinois Recruiters for information about Sandia National Laboratories and some of the research they conduct. Recruiters will be able to answer questions about the labs and employment opportunities. The majority of full-time R&D positions at Sandia require a Masters or PhD, so this information session is focused on Graduate Students. Sandia hires **all** Engineering majors with a strong focus on Computer Science, Cybersecurity, Mechanical and Electrical Engineering.

For more than 70 years, Sandia has delivered essential science and technology to resolve the nation's most challenging security issues. A strong science, technology, and engineering foundation enables Sandia's mission through a capable research staff working at the forefront of innovation, collaborative research with universities and companies, and discretionary research projects with significant potential impact. In keeping with our vision to be the nation's premier science and engineering laboratory for national security and technology innovation, we recruit the best and the brightest, equip them with world-class research tools and facilities, and provide opportunities to collaborate with technical experts from many different scientific disciplines.

Please Note: Most positions at Sandia require a DOE security clearance, which requires U.S. citizenship

Equal opportunity employer/Disability/Vet/GLBT 08/2018
Sandia National Laboratories is a multimission laboratory managed and operated by National Technology and Engineering Solutions of Sandia, LLC, a wholly owned subsidiary of Honeywell International, Inc., for the U.S. Department of Energy's National Nuclear Security Administration under contract DE-NA-0003525.
