

Advancing Creativity SYLLABUS

Course Objective

The purpose of this course is to **help others enhance their creativity, innovation, and vision**. You may have other, personal objectives for this course; develop those objectives and share them.

Assertions

Helping others enhance their creativity is crucial and involves acting on principles of creativity and instruction: understanding how creativity happens, encouraging development of appropriate skills, observing and offering feedback, challenging and creating change, and managing classroom and other settings where learning occurs.

Assignments

1. Work together on a class project: _____ (tbd).
2. Conduct a personal project, either:
