DESCRIPTION
This class will cover the chemical and physical foundations of biomolecular materials science. The course will consist of a series of modules on the structures and functions of basic classes of biological molecules, including lipid membranes, nucleic acids, and proteins. We will study how these biological materials self-assemble and often interact with one another into their functional forms. These aspects of biomolecular materials constitute a fundamental tool to design biomimetic systems.

INSTRUCTOR
Cecilia Leal, cecilia.l@illinois.edu
Office: 204 MSEB, OFFICE HOURS: upon request

TA
TBD
OFFICE HOURS
TBD

ASSESSMENT
Problem sets (7, expected) 25%
Research presentation 10%
In-class quizzes 5%
Mid-semester exam, 1h 50 min 30%
Final comprehensive exam, 3 hrs 30%

READINGS
Lecture Notes and Videos

WEBSITE
https://canvas.illinois.edu/courses/34239

TENTATIVE SCHEDULE
Instructional breaks: March 13-17 (Spring break), March 24 (Mid-semester exam), and March 31 (EOH)
Mid-semester Exam: March 23 to 25
Research presentations: Due April 28, 11 pm– upload on Canvas
FINAL EXAM: Finals week
ASSESSMENT

1. HOMEWORKS

Homeworks (HW) will be offered on PrairieLearn (https://prairielearn.engr.illinois.edu/). Please log in with your Illinois netID and enroll at MSE473 Spring 2023 semester. Please note: do NOT submit any HW answers before I activate and notify you on Canvas that a given HW is open. You may see HWs on PrairieLearn now but those are NOT finalized.

You will have infinite attempts to provide the right answer. If you complete the HW late you get 30% up to a week late. Past that, you get no credit but you can still practice the HW. Leaving HW to the last-minute results in overloading of the system and errors leading to late delivery of the HW. Do your homework early!

Homework solutions: The TA or Prof. Leal will go over homework solutions at office hours after the assignment is due.

2. EXAMS

All exams will be performed at the CBTF facility that have their own proctors. You normally have a period of a week to book and perform your exam. The time and duration of the exam will be adjusted to accommodate DRES and/or different time zones. (See more information below). If for health reasons (COVID-19), there is a need that a student takes an exam online, this will be arranged. Please inform me ASAP if issues like this arise.

3. PRESENTATIONS

You will select by yourself a paper from the journal Nature Materials (https://www.nature.com/nmat/). That’s the only allowed journal to select papers from. I want to make sure that you have access to a broad scope of topics in biomolecular materials. This paper can be a letter or a full paper, but it can not be a review paper. You have to read the paper and present it in a concise powerpoint presentation, recording yourself presenting in a maximum of 5 minutes. You shall post the presentation in Canvas by the due date stated above. Presentation templates and review criteria will be discussed in class.

TENTATIVE TOPICS

Basic Classes of Biomolecular Materials

1. Nucleic acids
   - Structure & function of DNA and RNA
   - Bending and Polyelectrolyte behavior

2. Proteins
   - Hierarchical organization
   - Physical basis of secondary structures Relationship between structure and function

3. Lipids & membranes
   - Self-assembly
   - Membrane elasticity
   - Lipid polymorphism

Interactions Between Biomolecular Materials

1. Van der Waals interactions
2. Electrostatic interactions
3. Hydrogen bonding & hydrophobic interactions

Applications and Characterization of Biomaterials
1. Gene and Drug delivery  
2. Biodegradable materials  
3. Active Matter  
4. Spectroscopic and Imaging techniques  

COURSE OBJECTIVES  

- To review physics and chemistry necessary for an understanding of biomaterials.  
- To teach students the basic interactions governing biology from the nanoscale to the mesoscale.  
- To teach students the basic materials science of the membrane.  
- To teach students the basic materials science of nucleic acids.  
- To teach students the basic materials science of proteins.  
- Give students an opportunity for teamwork in research.  
- Give students practice in basic expository research presentation.  

COVID-19/Pandemics  
MSE473 is planned as regular in-person instruction for the entirety of the Spring 2023 semester. However, we are prepared to abide to the recommendations of the Center of Disease Control (CDC), the State, and the University of Illinois, should any health-safety mandates arise.  

CBTF  
This course uses the College of Engineering Computer-Based Testing Facility (CBTF) for its exams. The policies of the CBTF are the policies of this course, and academic integrity infractions related to the CBTF are infractions in this course.  

1. Sign into the scheduler [https://cbtf.engr.illinois.edu](https://cbtf.engr.illinois.edu) to be added to the course and receive exam notifications.  
2. If you have accommodations identified by the Division of Rehabilitation-Education Services (DRES) for exams, please upload your Letter of Accommodations (LOA) to CBTF at: [https://cbtf.illinois.edu/students/dres](https://cbtf.illinois.edu/students/dres) Once students have uploaded their LOAs, the CBTF staff will send them a confirmation email that their LOA has been processed. Manager: Carleen Sacris at sacris1@illinois.edu.  
3. Review the Student Info up at [https://cbtf.illinois.edu/students/exam-procedure](https://cbtf.illinois.edu/students/exam-procedure) for the in-person testing procedures, rules, policies, FAQ’s, etc.  

If you have any issue during an exam, please inform the proctor/professor immediately. Work with the proctor to resolve the issue at the time before logging off.  

Diversity, Equity, and Inclusion Statement  
The University of Illinois, the Grainger College of Engineering, the Materials Science and Engineering department, and MSE473 operate under the guiding principle that “Our entire community benefits when individuals from different personal, cultural, and disciplinary perspectives are working together.” (https://matse.illinois.edu/dei). MSE473 will be a safe and inclusive place for active learning with no tolerance for discrimination of any kind.  

Academic Integrity Policy  
The University of Illinois at Urbana-Champaign Student Code should also be considered as a part of this syllabus. According to the Student Code, “It is the responsibility of each student to refrain from infractions of academic integrity, from conduct that may lead to suspicion of such infractions, and from conduct that aids others in such infractions.”  

Academic dishonesty may result in a failing grade. Every student is expected to review and abide by the Academic Integrity Policy: [http://studentcode.illinois.edu/](http://studentcode.illinois.edu/). Ignorance is not an excuse for academic dishonesty.
It is your responsibility to read this policy to avoid any misunderstanding. Do not hesitate to ask the instructor if you are ever in doubt about what constitutes plagiarism, cheating, or any other breach of academic integrity.

See also this quick reference guide to academic integrity:
https://provost.illinois.edu/policies/policies/academic-integrity/students-quick-reference-guide-to-academic-integrity/

**Academic Accommodations**

To obtain disability-related academic adjustments and/or auxiliary aids, students with disabilities must contact the course instructor and the Disability Resources and Educational Services (DRES) as soon as possible. To contact DRES, you may visit 1207 S. Oak St., Champaign, call 333-4603 (V/TDD), or e-mail a message to disability@uiuc.edu. http://www.disability.illinois.edu. DRES accommodations will be implemented in the CBTF.

**Family Educational Rights and Privacy Act**

Any student who has suppressed their directory information pursuant to Family Educational Rights and Privacy Act (FERPA) should self-identify to the instructor to ensure protection of the privacy of their attendance in this course. See https://registrar.illinois.edu/academic-records/ferpa for more information.

**Sexual Misconduct Policy and Reporting**

The University of Illinois is committed to combating sexual misconduct. Faculty and staff members are required to report any instances of sexual misconduct to the University’s Title IX and Disability Office. In turn, an individual with the Title IX and Disability Office will provide information about rights and options, including accommodations, support services, the campus disciplinary process, and law enforcement options. A list of the designated University employees who, as counselors, confidential advisors, and medical professionals, do not have this reporting responsibility and can maintain confidentiality, can be found at https://wecare.illinois.edu/resources/students/#confidential

Other information about resources and reporting is available at: https://wecare.illinois.edu

**Community of Care**

As members of the Illinois community, we each have a responsibility to express care and concern for one another. If you come across a classmate whose behavior concerns you, whether in regards to their well-being or yours, we encourage you to refer this behavior to the Student Assistance Center (217-333-0050 or http://odos.illinois.edu/community-ofcare/referral/). Based on your report, the staff in the Student Assistance Center reaches out to students to make sure they have the support they need to be healthy and safe. Further, we understand the impact that struggles with mental health can have on your experience at Illinois. Significant stress, strained relationships, anxiety, excessive worry, alcohol/drug problems, a loss of motivation, or problems with eating and/or sleeping can all interfere with optimal academic performance. We encourage all students to reach out to talk with someone, and we want to make sure you are aware that you can access mental health support at the Counseling Center (https://counselingcenter.illinois.edu/) or McKinley Health Center (https://mckinley.illinois.edu/). For mental health emergencies, you can call 911 or walk in to the Counseling Center, no appointment needed.
