

CEE 433: Water Technology and Policy

Ashlynn S. Stillwell, Ph.D.

Associate Professor, Elaine F. and William J. Hall Excellence Faculty Scholar
Civil and Environmental Engineering
University of Illinois Urbana-Champaign
301 N. Mathews Ave
3030 Civil and Environmental Engineering Building, Hydrosystems Laboratory
Urbana, IL 61801
ashlynn@illinois.edu
217-244-6507

COURSE INFORMATION

CEE 433: Water Technology & Policy
Civil and Environmental Engineering
Fall semester 2025, 3-4 credits

Class meeting: Mondays and Wednesdays, 8:30-9:50 AM; 3310 Newmark
(All times in this syllabus are in U.S. Central time)

Course websites: <http://canvas.illinois.edu>; <https://mediaspace.illinois.edu>
Lecture recordings: <https://mediaspace.illinois.edu>

This course will cover technical and social concepts of water and wastewater treatment, water resources, water policy and economics, and water systems. Emphasis will be on the intersection between water technology (from an engineering perspective) and water policy (from economic and societal perspectives). Communication is an important element of this course: engineers will learn to “speak” policy via writing assignments, multimedia presentation, and briefings (4-credit students only).

Course objectives. Throughout this course, students will 1) research water technology- and policy-related topics, 2) analyze interrelated systems, 3) synthesize ideas into technical analyses, and 4) present the results in a technology- and policy-related manner.

Prerequisites. Upper-level undergraduate or graduate standing; CEE 330, CEE 340, or CEE 350, or consent of instructor.

OFFICE HOURS

Office hours: Mondays and Tuesdays 2:00-3:30 PM, 3030 CEEB

COURSE POLICIES

Academic integrity. Each student is expected to complete their own work. Academic dishonesty, including cheating, plagiarism, and/or copyright infringement of any kind, will not be tolerated and will be reported to the appropriate administration. Academic dishonesty may result in a failing grade. Every student is expected to review and abide by the Academic Integrity Policy: <https://studentcode.illinois.edu/article1/part4/1-401/>. Ignorance is not an excuse for any academic dishonesty. It is your responsibility to read this policy to avoid any misunderstanding. Ask the instructor if you are in doubt about what constitutes plagiarism, cheating, or any other breach of academic integrity.

Use of generative AI. Generative artificial intelligence (AI) tools can be useful in certain contexts. The use of generative AI tools is permitted in this course for the following activities:

brainstorming and refining your ideas; fine tuning your research questions; finding and organizing information on your topic; and checking grammar and style. The use of generative AI **is not permitted** in this course for the following activities: impersonating you in classroom contexts, such as posting on the Canvas discussion board; completing individual or group work; and writing entire sentences, paragraphs, case studies, or papers to complete class assignments. You are responsible for the information you submit based on an AI query (e.g., that it does not violate intellectual property laws, or contain misinformation or unethical content). Your use of AI tools must be properly documented and cited to maintain academic integrity.

Illness. Following University policy, all students are required to engage in appropriate behavior to protect the health and safety of the community. *Students who feel ill must not come to class.* Students who miss class due to illness should view the recorded lecture online, contribute to the Canvas discussion board, and contact the instructor via email about options for making up missed work.

Emergency response recommendations. Emergency response recommendations can be found at the following website: <https://police.illinois.edu/em/>. Review this website and the campus building floor plans website to familiarize yourself with the building in the event of an emergency: <https://police.illinois.edu/em/building-emergency-action-plans/>.

Disability-related accommodations. To obtain disability-related academic adjustments and/or auxiliary aids, students with disabilities must contact the course instructor and the Disability Resources and Educational Services (DRES) as soon as possible. To contact DRES, visit 1207 S. Oak St., Champaign, call 217-333-1970, e-mail disability@illinois.edu, or go to <https://dres.illinois.edu>. If you are concerned you have a disability-related condition that is impacting your academic progress, there are academic screening appointments available that can help diagnose a previously undiagnosed disability.

Family Educational Rights and Privacy Act (FERPA). Any student who has suppressed their directory information pursuant to Family Educational Rights and Privacy Act (FERPA) should self-identify to the instructor to ensure protection of the privacy of their attendance in this course. See <https://registrar.illinois.edu/academic-records/ferpa/> for more information on FERPA.

Anti-racism and inclusivity. The Grainger College of Engineering is committed to the creation of an anti-racist, inclusive community that welcomes diversity along a number of dimensions, including, but not limited to, race, ethnicity and national origins, gender and gender identity, sexuality, disability status, class, age, or religious beliefs. The College recognizes that Black, Hispanic, and Indigenous voices and contributions have largely either been excluded from, or not recognized in, science and engineering, and that both overt racism and micro-aggressions threaten the well-being of our students and our university community.

The effectiveness of this course is dependent upon each of us to create a safe and encouraging learning environment that allows for the open exchange of ideas while also ensuring equitable opportunities and respect for all of us. Everyone is expected to help establish and maintain an environment where students, staff, and faculty can contribute without fear of personal ridicule, or intolerant or offensive language. If you witness or experience racism, discrimination, micro-aggressions, or other offensive behavior, you are encouraged to bring this to the attention of the course instructor if you feel comfortable. You can also report these behaviors to the Campus Belonging Resources team at <https://diversity.illinois.edu/diversity-campus-culture/belonging-resources/>. Based on your report, Campus Belonging Resources members will follow up and reach out to students to make sure they have the support they need to be healthy and safe. If

the reported behavior also violates university policy, staff in the Office for Student Conflict Resolution may respond as well and will take appropriate action.

Religious observances. Illinois law requires the University to reasonably accommodate its students' religious beliefs, observances, and practices regarding admissions, class attendance, and the scheduling of examinations and work requirements. You should examine this syllabus at the beginning of the semester for potential conflicts between course deadlines and any of your religious observances. If a conflict exists, you should notify your instructor of the conflict and follow the procedure at <https://odos.illinois.edu/community-of-care/resources/students/religious-observances/> to request appropriate accommodations. This request should be made in the first two weeks of classes.

Sexual misconduct reporting obligation. The University of Illinois is committed to combating sexual misconduct. Faculty and staff members are required to report any instances of sexual misconduct to the University's Title IX Office. In turn, an individual with the Title IX Office will provide information about rights and options, including accommodations, support services, the campus disciplinary process, and law enforcement options. A list of the designated University employees who, as counselors, confidential advisors, and medical professionals, do not have this reporting responsibility and can maintain confidentiality, can be found here: wecare.illinois.edu/resources/students/#confidential. Other information about resources and reporting is available here: wecare.illinois.edu.

CLASS PARTICIPATION

Participation in class discussion is required and constitutes a portion of the overall grade. See "Class discussion" under "Assignments".

LATE WORK POLICY

Late assignments. Late assignments will be accepted up to 24 hours after the due date for a 10% grading penalty. For example, if an assignment is due on November 5 at 11:59 PM and is submitted on November 6 at 9:00 AM (9 hours late), the original (hypothetical) grade of 83% will be recorded as 73%. Assignments submitted more than 24 hours late will be given a zero.

Late exams/quizzes. Late or make-up exams and quizzes are not allowed, except under extreme circumstances approved by the instructor in advance. Conflict exams must be taken in advance of the regularly scheduled exam, and only when approved by the instructor in advance. The late assignment policy does not apply to the take-home final, which will not be accepted late.

IMPORTANT DATES*

*University dates vary for undergraduate and graduate students. Confirm online for exact dates.

Sept 8	Add course deadline
Sept 29	Individual project proposal due, 11:59 PM
Oct 15	Midterm exam, 8:30 AM
Oct 17	(Undergraduate) drop course deadline; credit/no-credit deadline
Nov 3	Project outline due, 11:59 PM
Nov 14	(Graduate) drop course deadline; credit/no-credit deadline

Nov 19	Case study due, 11:59 PM
Nov 22-30	Fall break
Dec 10	Project paper and video due, 11:59 PM
Dec 15	Take-home final exam due, 11:59 PM

ASSIGNMENTS

Individual project. The main assignment of this course is an individual project, including an analytical paper and video (multimedia presentation). Length requirements vary for 3-credit and 4-credit students:

3-credit students Paper: ≤ 8 single-spaced pages Video: 3 ± 0.5 minutes

4-credit students Paper: ≤ 12 single-spaced pages Video: 5 ± 0.5 minutes

The project should be an original analysis (beyond a literature review) of a water-related topic, including elements of both technology and policy. Papers that focus completely on technologies with no consideration for policy or analyze policy without including engineering elements will not score highly. Both engineering and policy concepts must be present in the analysis. Technology considerations must include 2 or more traditional civil engineering areas.

A 1-page project proposal is due at 11:59 PM on September 29. The proposal should include a brief synopsis and scope of the proposed project, an outline of the methodological approach, and pertinent data sets and references to complete the analysis.

A detailed 3-page outline including references is due at 11:59 PM on November 3.

The final paper, meeting the length limits above, is due at 11:59 PM on December 10.

Communicating in a modern policy environment requires more than just effective written communication. Use of multimedia technology is increasingly important in a policy context and can be an efficient method of describing rigorous work to broad audiences. Each student will create a video (multimedia presentation), meeting the time requirements above, describing the analysis covered in their paper. The video should use both audio and visual elements to convey information. Be conscious of copyright requirements and do not use copyrighted material without proper permissions.

The video is due at 11:59 PM on December 10 and should be uploaded to the class MediaSpace channel.

Additional details regarding the project paper and video, including resources to help complete the project, will be discussed later in the semester.

Homework/quizzes and case study. Homework assignments and in-class quizzes will take place throughout the semester. Homework assignments will reinforce the technical concepts from class. In-class quizzes will cover reading assignments for weeks with more policy material. Online students should complete quizzes on Canvas on the same day as in-class students. One case study, to be completed in pairs/groups, will take place during the semester and is due at 11:59 PM on November 19.

Midterm exam. The midterm exam will take place on October 15 in class. Topics covered by the exam will be described during the in-class review.

Take-home final exam. The take-home final exam will be issued during the last lecture and is due at 11:59 PM on December 15.

Class discussion. Different perspectives inform how we think about water issues, and discussion can be a productive means of sharing information. Participation in class discussion constitutes a portion of the overall course grade. In lieu of in-class participation, online and in-class students may contribute to the asynchronous Canvas discussion board for each week's topic for participation points. Discussion contributions should be substantial, productive, and respectful. Contributions to the weekly Canvas discussion board – one post for each lecture not attended in person – are due by noon on Monday of the following week.

Additional requirements for 4-credit students. Students enrolled in the 4-credit section will have additional assignments to justify the additional credit. Throughout the semester, 4-credit students will write three 2-page policy memos on a topic of choice pertaining to water technology and policy. All three memos are due by 11:59 PM on December 10; however, the memos may be submitted at any time throughout the semester. It is highly suggested that 4-credit students complete and submit memos early in the semester to avoid time management issues between the memos and the individual project.

In addition to the three policy memos, each 4-credit student will give a 3-minute oral policy briefing to the class. The briefing may cover a topic addressed in the memos or a different topic, as long as the subject matter is related to water technology and policy. Briefings will take place synchronously at the beginning of class, and the instructor will determine the schedule. Asynchronous oral briefings are allowed with approval in advance.

GRADING

3-credit students		4-credit students	
Project paper	20%	Project paper	20%
Project video	10%	Project video	10%
Final exam	20%	Final exam	20%
Midterm exam	20%	Midterm exam	20%
Homework/quizzes	10%	Homework/quizzes	10%
Case study	10%	Case study	5%
Participation*	10%	Policy memos	5%
	100%	Briefing	5%
		Participation*	5%
			100%

*Grading for participation will be assessed based on discussion in class or asynchronous Canvas discussion board posts. More than 2 absences without substantial contributions to the week's discussion board on Canvas by noon on Monday of the following week will reduce the participation grade.

Letter grades will be assigned using a plus/minus system, as below:

A	93.0-100.0%
A-	90.0-92.9%
B+	87.0-89.9%
B	83.0-86.9%
B-	80.0-82.9%
C+	77.0-79.9%
C	73.0-76.9%
C-	70.0-72.9%
D+	67.0-69.9%
D	63.0-66.9%
D-	60.0-62.9%
F	59.9% and below

LEARNING RESOURCES

Required materials. Reading materials required for the course will be available on the class Canvas site. Resources include the following:

SCHEDULE

Assigned reading is to be completed before the start of class.

Week	Date(s)	Topic	Reading	Assignment Due
1	Aug 25	Importance of water		
	Aug 27	Water and civilization	Fagan; Pennell et al.	
2	Sept 1	NO CLASS (Labor Day)		
	Sept 3	Hydrology: surface water		
3	Sept 8	Hydrology: groundwater		
	Sept 10	Water law: Clean Water Act	(skim) CWA; Papacostas	
4	Sept 15	Water law: water rights systems	Perramond; Schutz	HW1
	Sept 17	Water law: water rights systems (continued)	Podolak & Doyle	Q1
5	Sept 22	Water law: WOTUS	Acuña et al.; (skim) WOTUS rules (2015 and 2018)	
	Sept 24	Water law: WOTUS (continued)		
6	Sept 29	Water financing: cost-benefit analysis		Project proposal
	Oct 1	Water financing: insurance		HW2
7	Oct 6	Water financing: markets	Howe; Jones	Q2
	Oct 8	Water financing: economics (price, cost, value)	Teodoro & Thiele	HW3
8	Oct 13	Water financing: privatization		
	Oct 15	Midterm exam		
9	Oct 20	Treatment: drinking water; desalination		
	Oct 22	Treatment: water quality in distribution systems	Edwards & Pruden; Wang et al.	
10	Oct 27	Treatment: wastewater treatment		
	Oct 29	WWTP field trip		
11	Nov 3	Energy: hydraulic fracturing	Stokstad	Project outline
	Nov 5	Energy: power generation	Grubert & Sanders; Gerbens-Leenes et al.	
12	Nov 10	Energy: renewables and the grid	(read in order): Jacobson et al. (2015); Clack et al.; Jacobson et al. (2017); Rhodes	Q3
	Nov 12	Power plant field trip		
13	Nov 17	Energy: biofuels		
	Nov 19	Water and food	Springer & Duchin; West et al.	Q4, Case study
14	NO CLASS – Fall Break (Nov 24, 26)			
15	Dec 1	Bottled water	Rosinger & Young; Purtill & Rust	
	Dec 3	Bottled water (continued)		
16	Dec 8	Water at the movies		
	Dec 10	No lecture – work day		
	Dec 10	Project paper and video due 11:59 PM		
	Dec 15	Final exam due 11:59 PM
