*Illinois Tollway
Warm Mix Asphalt –
Lessons Learned*

Steven L. Gillen – *Manager of Materials, Pavements
and Construction Research*

The Illinois Tollway
DRIVING THE FUTURE

Illinois Bituminous Conference, December 12, 2012

1

Tollway WMA - 2012

- ▶ **762,000+ total tons**
- ▶ **SMA mainline**
 - ▶ **304,000 tons**
- ▶ **N50 Shoulder Binder**
 - ▶ **204,000 tons**
- ▶ **N70 Shoulder Surface**
 - ▶ **210,000 tons**
- ▶ **Stabilized Subbase**
 - ▶ **8,400 tons**

2

Tollway WMA - 2012

- ▶ 10 different plants
- ▶ 2 chemicals
 - ▶ Evotherm (4)
 - ▶ Rediset LQ (3)
- ▶ 3 water injection
 - ▶ ASTEC (1)
 - ▶ MAXAM AQUABlack (1)
 - ▶ Stansteel Accu-Shear (1)

3

Tollway WMA - 2012

- ▶ High recycle in Tollway WMA:
- ▶ SMA
 - ▶ All used RAS (2 GTR, 7 SBS)
 - ▶ ABR – 31 to 38%
- ▶ Shoulder Binder and Surface
 - ▶ ≈ Half used RAS
 - ▶ Binder ABR – 33 to 50%
 - ▶ Surface ABR – 30 to 40%
- ▶ Stabilized Subbase
 - ▶ Both used RAS; both had 64% ABR

4

- ▶ RAS needs higher temperature

WMA Lessons Learned

- ▶ **Mix temperature ranges**
 - ▶ **Mix type**
 - ▶ Shoulder mixes and moderate RAP: 250 - 270F
 - ▶ Shoulder mixes with RAS: 280 – 300 F
 - ▶ SMA with RAS: 280 – 320F
 - ▶ **Plant and personnel**
 - ▶ **Weather (night, day, summer, fall)**

WMA Lessons Learned

- ▶ **Contractor Learning Curve – some: steep**
- ▶ **All technologies “performed” effectively**
- ▶ **Industry-wide: Plant Operations need reviewing to fully implement WMA**
 - ▶ **Flighting, air flow – for both WMA and high recycle**
 - ▶ **Combination of high recycle and lower temperatures**
 - ▶ **Stress on motors from stiff mixes (SMA + RAS + modified PG)**

WMA – Moving Forward

- ▶ **Contractor**
 - ▶ Personnel need to become comfortable with the practice
 - ▶ Plant “optimization” to incorporate WMA and high recycle
 - ▶ Investigation of benefits
 - ▶ Lower energy
 - ▶ Compaction aid

7

WMA – Moving Forward

- ▶ **Agencies**
 - ▶ Proven to Improve Performance
 - ▶ Better Definition of “Warm Mix” Needed
 - ▶ Temperature
 - ▶ “Use of the technology”
 - ▶ Mix variables (RAP, RAS, modified PG)

8

Specifications Needed to Better Define WMA

- ▶ Tollway specifications in 2012 provided with little control on temperature
- ▶ Better control on production temperature limits to be established for 2013 contracts
- ▶ More lessons to be learned by all

9

THANK YOU
