GUIDELINES FOR, AND THE ADMINISTRATION OF, THE DOCTORAL PRELIMINARY EXAMINATION AND THE DOCTORAL FINAL EXAMINATION

The Preliminary Examination:

The Preliminary Examination is essentially an oral examination on a proposed dissertation topic and the student’s academic preparation. The examination is taken upon completion of all required coursework for the Ph.D. degree, or the semester in which the final unit of coursework is taken, but no sooner, and is administered by a committee which is appointed by the Graduate College in accordance with departmental requests.

The Dissertation Proposal:

The written dissertation proposal shall be no more than 20 double spaced pages in length including introductory pages, figures, etc. It should include: statement of proposed research, its objectives and significance; a brief review of previous work on related research; and a short discussion of tentative methods of analysis and / or experimentation. There are no specific format requirements for the proposal.

Registration Requirements:

Students must be enrolled the semester they take the Preliminary Examination.

The Final Examination:

The Final Examination consists of an oral defense of the dissertation and is administered by the doctoral committee the examination is open to the public. The Final Examination in Mechanical Engineering is to be taken no earlier than six months following the Preliminary Examination for ME students. TAM students may schedule a Final Defense at the discretion of their academic advisor.

The Dissertation:

Detailed instructions for the preparation and completion of the thesis dissertation are available from the Graduate College website, http://www.grad.illinois.edu/thesis.

The Examination Committee:

This committee shall have a minimum of four faculty members from the University of Illinois at Urbana-Champaign with at least one member not from the department of the candidate. Committee members from outside the University of Illinois at Urbana-Champaign are welcome, but would serve in addition to the four University of Illinois at Urbana-Champaign committee members.

Three of the committee members must be listed as Graduate Faculty members and two must be tenured (Associate Professor or Professor). The committee should include faculty members from more than one area of specialization.

The “Chair” must be a member of the Graduate Faculty from the candidates department and may also be the Director of Dissertation Research. The chair is responsible for convening the committee, conducting the examination, and submitting the Certificate of Result to the department in which the student is enrolled.

If a “Contingent-Chair,” is designated (not required) he or she must be a member of the Graduate Faculty and must be a MechSE faculty member. The Contingent-Chair serves if the original chair is unable to serve for any reason.

The Director of Dissertation Research is responsible for guiding/advising the student in their thesis research as part of an ongoing research project. He/ she may also discuss a tentative course of study or recommend a sequence of courses the student can take reflecting the interest of the student.

A Department Affiliate cannot serve as a “Chair” or a “Contingent Chair” of a Preliminary Examination or Final Examination Committee. Only faculty members of the Department of Mechanical Science and Engineering may serve in that capacity.

If a proposed voting member is not on the Graduate Faculty, a copy of the proposed member’s CV and a letter of justification from the Committee Chair needs to accompany Attachment A (for Prelim) or C (for Final). The justification letter should include
information about the proposed member’s expertise in the area of research and association to the candidate. Non-voting members, such as an external reader, a member of the faculty who is off campus, or others who can make a significant contribution to the research, may be appointed. A letter of justification is not needed to appoint a non-voting member to the committee.

Both Voting and non-voting committee members may sign the “Thesis/Dissertation Approval” form that becomes part of the thesis document. Only the voting members of the dissertation committee sign the Certificate of Result.

If, for some reason, your examination committee has to be changed (committee member dropped or added, etc.), please inform the Graduate Programs Office immediately, as this will require a new “Request to Appoint a Doctoral Examination Committee” form to be submitted to the Graduate College (Form A or C).

Scheduling and Timing of the Preliminary and Final Examinations:

1. Candidates must provide the Graduate Programs Office with the information requested in Attachment A or C no later than (2) weeks prior to the proposed Preliminary/Final Examination date.

2. Candidates are responsible for providing an electronic copy of the Prelim Proposal to the committee (2) weeks prior to the Preliminary Examination date if possible, and not later than (1) week. An electronic copy of the proposal should also be provided to the Graduate Programs Supervisor no later than (1) week prior to the proposed Preliminary Examination date.

3. Candidates must provide the Graduate Programs Supervisor with the information requested in Attachment B no later than (1) week prior to the proposed Preliminary Examination date.

   (All exams are to be held virtually via Zoom or Skype until further notice. Students are responsible for scheduling the exam.)

4. Within six-nine (6-9) months after successful completion of the preliminary examination, and at least two (2) weeks prior to the proposed date of the Final Examination, the candidate should provide the Graduate Programs Office with the information requested in Attachment C. Meaning; students are expected to take their Final Exam within one (1) year of completion of the Preliminary Examination.

5. At least one (1) week prior to the FINAL EXAMINATION date, the candidate must provide the Graduate Programs Office with the information requested in Attachment D. an electronic copy of the abstract and an electronic copy of the research summary (a 1 paragraph – ½ page description of your research that people who do not work in that area would be able to understand what your research is about.) This is needed in order to compose the announcement that is sent out to MechSE Faculty and graduate students.

6. Rules on who must attend these exams: Graduate College now states that no more than two committee members can “remote” in to the examination, and those members cannot be the Chair or Director of Dissertation. They must be physically present.

   When arranging a room for the FINAL EXAMINATION, first see staff in the Support Services Office, Rm 1270 DCL (or e-mail them at mechse-sso@illinois.edu). If there is not a conference room available that will seat at least 30 people, then you should consult the staff in the Undergraduate Office, Rm 156 CAB, to schedule a classroom.

THE DEPARTMENT OF MECHANICAL SCIENCE AND ENGINEERING REQUIRES A MINIMUM OF SIX MONTHS BETWEEN THE PRELIMINARY AND FINAL EXAMINATIONS

Following the Examinations:

After completion of the preliminary examination and final examination, “The Certificate of Result of the Preliminary/Final Examination”, signed by each committee member, must be returned to the Graduate Programs Office, Rm 160 MEB, for processing. The Certificate of Result is submitted to the Graduate College and, thereby, recorded officially in the system. Degree Certification cannot take place until both exam results have been officially recorded and show in the system. Students must be enrolled the semester they take the Prelim and the Final Exam (you may enroll for 0 hrs 599 thesis research if all coursework/hour requirements have been met. If you are on campus, MechSE requires you to also register for the MechSE Seminar – ME 590/TAM 500 – until you have passed the Prelim.
Obtaining the Department Head’s signature on the Thesis Dissertation Approval (TDA) form: Following the Final Examination the “TDA” form, signed by the committee members, should be brought to the Graduate Programs Office. The form will be held in the Graduate Programs Office until the dissertation has been submitted for Department Format Review and any required changes have been made. The Graduate Programs Supervisor will then submit the Department Format Approval and the signed TDA form to the Graduate College. At this point students may upload their thesis to the Graduate College so they can begin their review.

Ph.D. Exit Interview with MechSE Department Head: Ph.D. students are requested to schedule a brief (approximately 15 minute) “exit interview” with the Department Head. This is done through the DH secretary and students should plan to schedule at least two weeks prior to the date they expect to leave campus, but not before completion of the Final Exam.

Department Clearance Form: When the Thesis/Dissertation Department format review is completed, students will receive, via e-mail from the Graduate Programs Office, the Department Clearance Form. This must be completed and returned to the Graduate Programs Office prior to leaving campus.
