

Bioengineering Curriculum Map

Students should use this curriculum map as a guide to have a more informed discussion with the departmental academic advisor when selecting courses.

Students not taking courses as advised may result in a delayed graduation date.

<i>First Year</i>		<i>Second Year</i>		<i>Third Year</i>		<i>Fourth Year</i>

¹MATH 220 may be substituted. MATH 220 is appropriate for students with no background in calculus. 4 of 5 credit hours count towards degree.

²External transfer students take ENG 300.

³RHET 105 (or an alternative Composition I sequence) is taken either in the first or second semester of the first year, according to the student's UIN (Spring if UIN is Odd). MCB 150 is taken in the other semester. Composition I guidelines can be found at <http://catalog.illinois.edu/general-information/degree-general-education-requirements/> under Written Communication Requirement.

⁴General education: Students must complete the Campus General Education requirements including the campus general education language requirement (<https://courses.illinois.edu/gened/DEFAULT/DEFAULT>).

⁵Students choose whether to take BIOE 198 (MI) in second semester or CS 101 or CS 124 in third semester.

⁶Additional coursework, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree (go.grainger.illinois.edu/FreeElectives).

⁷Track elective credits totaling 15 hours, selected from dept approved list, can be found at <http://catalog.illinois.edu/undergraduate/engineering/bioengineering-bs/#degreerequirementstext>.

⁸Prerequisite for BIOE 414 is either BIOE 205, ECE 205 or ECE 210.
