Score: \_\_\_\_\_ / 20

Instructions:

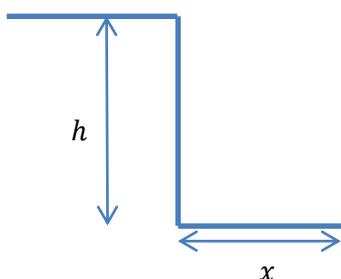

- Do your own work.
- Answer the questions below in the space provided.
- Make sure you show all your work and any equations that you use.
- Please place a box around your answers.
- Remember to give the correct units with all numerical answers

Q1	Q2	Q3	Q4
10	10	5	5

1. You throw a ball off of a cliff with an angle  $\theta = +45^\circ$ . The ball has an initial speed  $v_0 = 3.25 \text{ m/s}$  and reaches the ground after travelling  $x = 6 \text{ m}$ . Let the x-direction be horizontal and the y-direction be vertical.

a. Draw a picture of the path you expect the ball to take to the ground. Include the coordinate system.

Picture:

b. Now let's work on the motion of the ball.

Acceleration:  
Direction:  
 $v_x$   
 $v_y$ :

- What is the magnitude of the acceleration of the ball?
- What is the direction of the acceleration?
- What is the x-component of the ball's initial velocity ( $v_{0x}$ )?
- What is the y-component of the ball's initial velocity ( $v_{0y}$ )?

c. Now we want to find the distance  $h$ . Select the equations you could use to calculate  $h$  (select all correct equations).

Choice (1 pts):

- $x(t) = x_0 + v_{0x}t + \frac{1}{2}a_x t^2$
- $y(t) = y_0 + v_{0y}t + \frac{1}{2}a_y t^2$
- $v_x^2 = v_{0x}^2 + 2 a_x \Delta x$
- $v_y^2 = v_{0y}^2 + 2 a_y \Delta y$

d. How much time does it take the ball to reach the ground?

Solution (2 pts):

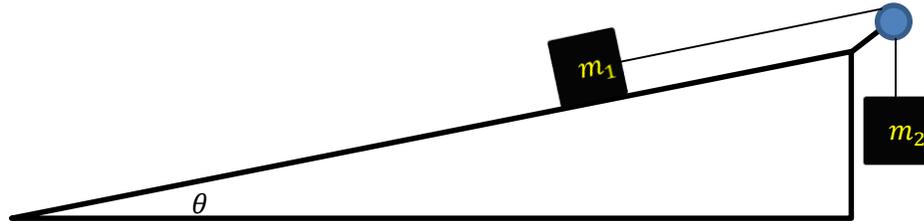

e. What is the height,  $h$ , of the cliff?

Solution (2 pts):

2. A block of mass  $m_1$  is in contact with a frictionless ramp. The angle between the ramp and the floor is  $\theta = 15^\circ$ . The block is connected to a second block of mass  $m_2$  by a massless cord over a frictionless pulley as shown in the diagram.

a. Select a coordinate system and complete the free-body diagram. Include your coordinate system(s) on the diagram. (Hint: Will it be easier to give each block its own coordinate system?)

Diagram (2pts):

b. Let's consider the motion of the blocks (Hint:  $F_{net} = ma = \sum F$ ):

- i. Can this system be in equilibrium?
- ii. Use Newton's Second Law to write equations for the forces on  $m_1$ .
- iii. Use Newton's Second Law to write equations for the forces on  $m_2$ .

Equilibrium (1 pt):  
 $F_1$  (1 pt.):  
 $F_2$  (1 pt):

c. If the system is in equilibrium, what is the ratio  $m_1/m_2$ ?

Solution (5 pts):
