

Why Tech Companies Care About Your Physics PhD

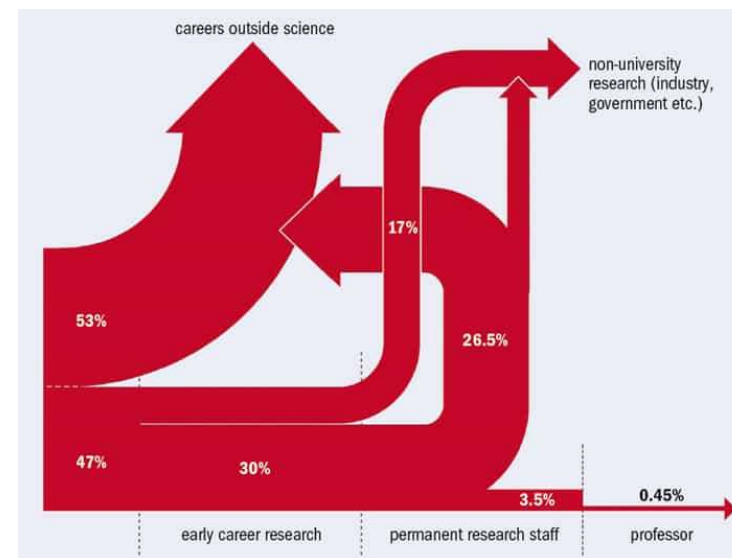

Souvik Dutta
Ph.D., UIUC 2021

Statistics

40% of Physics PhDs obtain PostDoc positions overall.

- <https://physicstoday.scitation.org/doi/10.1063/PT.3.4591>

The reality beyond obtaining PostDoc positions.

Academia and Industry: what's the link?

Daily Life in a Tech Job	Transferable Skills from a Physics PhD
Attend team meetings, ask questions	Research group meetings
Invited to external meetings	Attended workshops and schools
Competitive Analysis	Reading papers on arXiv
Make presentations to own team	HEP/CMP journal club presentations
Make presentation to external teams	Poster PPTs, talks in conferences
Maintain code/codebase	Coding on Mathematica/MATLAB, etc.
Mentor summer interns	Mentor first/second Year grad students
Communicate with PMs, SDEs, CX, UX	Collaboration between theory/experiment
Make \$\$\$	

OK, but...

I am giving up on my dream to be a Physics Professor, is it worth it?

- Can still work on interesting problems
(Think Meta VR, Tesla Autopilot, Automated trading)
- Problems you solve will help the society/humanity *right now*
- Don't have the need to publish or perish
- The guy in the next office is not your competitor
(You're not applying for the same grant, position, etc.)
- You are driving a commonly shared goal across your company
- If you don't like your boss/team/company goals, it's easy to switch out
- Most people are extremely punctual, and they respect your time
- Your weekends are your weekends

Let's talk money

Preparing for a Machine Learning Interview

- Some coding skills are essential: R, C++, Java, Python

- Machine Learning skillset

- ML Tech Blogs

- Industry Blogs

Preparing for a Machine Learning Interview*

* as a Physicist

- The most **difficult** equation in machine learning is

$$\frac{\partial h}{\partial x_1} = \frac{\partial h}{\partial u_1} \cdot \frac{\partial u_1}{\partial x_1} + \frac{\partial h}{\partial u_2} \cdot \frac{\partial u_2}{\partial x_1}$$

- The most **complex** function used in machine learning is

$$p(x) = \frac{1}{1 + e^{-(\beta_0 + \beta_1 x)}}$$

- The hard bit is to develop an intuition for these algorithms, which model to use, what happens when we tweak parameters, etc.

model.fit()

model.predict()

Curriculum Vitae

- Format: Don't worry about searching for fancy, colorful, complex templates. A plain old boring B/W template works.
- Write accomplishments with X-Y-Z
"Accomplished [X], as measured by [Y], by doing [Z]"
- Start every accomplishment with a verb in past tense.
Strong Verbs (Led) >>>> Soft Verbs (Assisted)
Led, Designed, Researched, Prioritized, etc.
- Might want to skip the "skills" section entirely by embedding skillset inside of accomplishments – helps bring out the context in which the skills were applied
- Not every accomplishment has to have impact but try to add as many as you can. Impact shows that you can **do the job - well** and **make a difference**.
(What is it that without YOU it wouldn't have been possible? What did it cause? How did you measure what happened?)
- Length? 1, 2, 3 pages are ALL ok. You may have a lot of experience. Make it RELEVANT, that's what matters.
Tailoring your resume to the job >>>> almost everything else.
Don't submit the same resume to every job.
Triple-check for grammar/spelling mistakes.

DIEGO GRANADOS	
EDUCATION	
DUKE UNIVERSITY, The Fuqua School of Business <i>Master of Business Administration</i> Tech Club Co-President. Concentration in Data Science and Product Management. Teacher assistant for Marketing, Management Communication and Business Computer Applications. Career Fellow.	Durham, NC 2017
ITESM (MONTERREY INSTITUTE OF TECHNOLOGY) <i>Bachelor of Science, Electronic and Telecommunications Engineering</i> Graduated Magna Cum Laude. Founder and President of Technology and Electronics Engineering Society. Scholarship recipient for academic performance. Lead musician on the school's representative band.	Mexico City, Mexico 2011
EXPERIENCE	
CISCO SYSTEMS, INC <i>Product Manager for Cloud IoT SaaS – Web & Mobile</i>	San Jose, CA 2017 - Present
<ul style="list-style-type: none"> • Led UI/UX and Engineering teams using Agile to develop Operational Insights Web (Cloud) and Mobile applications, working with internal stakeholders and customers to incorporate feedback into application. • Launched Operational Insights (Web & Mobile), created forecasts and metrics reporting in Tableau, defined Product strategy, Customer acquisition strategy, and Go-to-Market. • Prioritized Product Roadmap with developers, aligning the product vision with the market needs and business strategy. Owned P&L and reached goal 4 months before forecast. • Researched market opportunity and defined customer segmentation and value proposition, as well as the pricing, licensing, and marketing and sales content. • Evangelized product in road shows, Cisco Live, events with social media influencers and C-Level executives. 	
FAKTOS	
<i>Business Intelligence Consulting Firm. MicroStrategy and Teradata partner.</i>	
<i>Business Intelligence Senior Consultant – Business Development (Promoted one year earlier than program schedule)</i>	
<ul style="list-style-type: none"> • Designed a data transformation process that increased the business efficiency by 30% while managing a UX/UI and development team to automate performance scorecards for 400+ US retail stores; worked with the CEO and CIO to model, analyze and build an innovative set of metrics (KPIs) and evaluation categories. • Led the client's global cross-functional teams to design and implement a unique web and mobile ecosystem that improved the company's ability to analyze and manage their insurance business and grew the user base to 100,000 three months ahead of plan. • Created and led a new service line that provides customers with training sessions and business insights which resulted in 80% project revenue increase on average and 100% client return for additional projects. • Took leadership inside the pre-sales technical advisory team to identify new potential clients which resulted in winning a portfolio of clients achieving 60% increase in average project profit. 	
<i>Business Intelligence Consultant</i>	
<ul style="list-style-type: none"> • Led the first intern training program that reduced training time by 60%, increased interns' performance and reduced project cost by 40%. Mentored new consultants inside the team. • Developed a data analysis dashboard for American Express which helped the client to increase their sales by 60% while working closely with global cross-functional teams in Mexico City, NYC and Phoenix. 	
ITESM (MONTERREY INSTITUTE OF TECHNOLOGY), MATHEMATICS DEPARTMENT	
<i>Mathematics Teacher (Part-time)</i>	
<ul style="list-style-type: none"> • Taught mathematics courses in English to high school students accepted in the university's elite bi-cultural program. I proactively used videogames, internet and science fiction to help students learn faster. 	
ADDITIONAL INFORMATION	
Udacity Nanodegrees: Android Basics by Google, Front End Web Developer.	
Skills: Certified in Microstrategy (Data analysis) and Agile, Excel, Powerpoint, databases, Data modeling, SQL and Java Knowledge .	
Interests: iPhone photography. Sax and guitar player. Video games and always being <i>Ready as Player One</i> .	
Language: Fluent in English and Spanish (native), basic German and Portuguese.
