

Instructor of Physics Position

The Department of Chemistry and Physics at Indiana State University seeks applications for an instructor position beginning August 2023. Candidates must have a Ph.D. in physics, physics education, or astronomy. ABD candidates will also be considered. This is a ten-month appointment on a three-year renewable contract with competitive salary and benefits. The successful candidate will have a commitment to excellence in undergraduate teaching. Principal teaching responsibilities include lecture and laboratory courses in introductory physics (majors and non-majors) and astronomy. Additional responsibilities may include collaboration with colleagues in updating and developing laboratory experiments and lecture curriculum. Summer teaching opportunities may be available. Visit https://www.indstate.edu/cas/chem_phys for further information about the Department.

Submit applications electronically at <https://jobs.indstate.edu/postings/41735>, including a cover letter that describes teaching experience and interests, a statement of teaching philosophy, a curriculum vitae, and copies of all undergraduate and graduate transcripts. Applicants should also arrange to have three confidential letters of recommendation uploaded by their letter-writers to this website. The references provided on the application will receive a notification email requesting a recommendation letter. Any other correspondence should be directed by e-mail to the search committee chair, Prof. Joseph West, at Joseph.West@indstate.edu.

Review of applications, including letters of recommendation, will begin January 3, 2023 and continue until the position is filled.
