

MechSE WELLness

I02 WELL Accredited Professional

Intent: Recognize projects that engage a WELL Accredited Professional to support the WELL certification process.

What are the requirements to earn this credit?

1. At least one member of the team has achieved the WELL Accredited Professional credential and maintains it until the project's initial certification is achieved.

How is MechSE accomplishing these requirements?

As part of the WELL Certification process, we hired a WELL consultant, Ms. Helen Kessler to assist us. This was Helen's very first WELL project as an accredited professional! Helen has decades of experience in delivering LEED Certification projects throughout the United States. As a registered architect, she regularly teaches two classes at Northwestern University regards sustainability and trending practices.
