

MechSE WELLness

103 Educate WELL

Intent: Promote on-going education about WELL by offering building tours and educational components highlighting WELL features pursued for certification.

What are the requirements to earn this credit?

1. Offer free tours at least six times per year with a minimum attendance of 50 people per year.
2. Include at least two WELL educational components alongside the tours (e.g permanent signage highlighting WELL features, a case study about WELL Certification, a newsletter, or other printed/online publication highlighting occupant engagement with WELL).
3. Describe how tours are advertised (website, signage, social media).

How is MechSE accomplishing these requirements?

Signage will soon be in place which highlights WELL features we achieved at LUMEB. Our Director of Facilities or a member of the WELL Committee will offer tours throughout the year to meet the requirements above and help all understand how LUMEB enables each of our well-being. The rest is up to us to take advantage of all the features!
