

# Updated UIUC IRB Policy after discussions with campus leadership about issues with clinical faculty working with med students on clinical studies

UIUC IRB will now accept Carle CITI training for CI MED; see <https://oprs.research.illinois.edu/standards/oprs-sop-102-training-and-education> and specifically this text:

“Documentation of completion of Carle's CITI training requirements will be accepted in lieu of the Core IRB Training module for a Carle employee with an appointment at the University of Illinois Urbana-Champaign who is working in collaboration with Carle Illinois College of Medicine students.”

Working on additional changes to the UIUC intake form for single IRB review @ Carle for expedited studies (more to come)
