2. Hazards Identification

Emergency overview DANGER

STRONG INORGANIC ACID MISTS CONTAINING SULFURIC ACID CAN CAUSE CANCER.

Risk of cancer depends on duration and level of exposure.

Corrosive. Causes severe skin and eye burns. Causes digestive tract burns. Mist or vapor

extremely irritating to eyes and respiratory tract. Material reacts with water.

OSHA regulatory status

This product is considered hazardous under 29 CFR 1910.1200 (Hazard Communication).

Potential health effects

Routes of exposure Ingestion. Inhalation. Skin contact. Eye contact.

Eyes Corrosive. Causes severe eye burns. Vapor or spray may cause eye damage, impaired sight or

blindness.

Skin Corrosive. Causes severe skin burns.

Inhalation Corrosive. May cause damage to mucous membranes in nose, throat, lungs and bronchial

system.

Ingestion Corrosive. Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus and

possibly the digestive tract.

Target organs Eyes. Skin. Lungs. Respiratory system.

Chronic effects Cancer hazard - can cause cancer. Corrosive. Prolonged contact causes serious tissue damage.

Potential environmental effects Harmful to aquatic organisms. The product may affect the acidity (pH-factor) in water with risk of

harmful effects to aquatic organisms.

3. Composition / Information on Ingredients

Hazardous components	CAS#	Percent
SULFURIC ACID	7664-93-9	90 - 100
Non-hazardous components	CAS#	Percent
WATER	7732-18-5	2 - 10

Material name: Sulfuric Acid MSDS US COV

MSDS ID: S8234 Version #: 11 Revision date: 04-19-2011

4. First Aid Measures

First aid procedures

Eye contact Immediately flush with plenty of water for at least 15 minutes. If easy to do, remove contact

lenses. Call a physician or poison control center immediately. In case of irritation from airborne

exposure, move to fresh air. Get medical attention immediately.

Skin contact Immediately flush with plenty of water for at least 15 minutes while removing contaminated

clothing and shoes. Call a physician or poison control center immediately. Wash clothing

separately before reuse. Destroy or thoroughly clean contaminated shoes.

Inhalation Move to fresh air. If breathing stops, provide artificial respiration. If breathing is difficult, give

oxygen. Call a physician or poison control center immediately.

Ingestion Call a physician or poison control center immediately. Do not induce vomiting. If vomiting occurs,

the head should be kept low so that stomach vomit doesn't enter the lungs.

Notes to physician Keep victim under observation. Treat symptomatically.

General advice In the case of accident or if you feel unwell, seek medical advice immediately (show the label

where possible). Show this safety data sheet to the doctor in attendance. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire Fighting Measures

Flammable properties The product is not flammable. No unusual fire or explosion hazards noted.

Extinguishing media

Suitable extinguishing

media

Carbon dioxide (CO2). Dry chemical powder. Foam.

Unsuitable extinguishing

media

Do not use water as an extinguisher.

Protection of firefighters

Specific hazards arising from the chemical

Fire may produce irritating, corrosive and/or toxic gases.

Protective equipment and precautions for firefighters

Use water spray to cool unopened containers. Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Cool containers exposed to flames with water until

well after the fire is out.

Special protective equipment for

fire-fighters

Wear full protective clothing, including helmet, self-contained positive pressure or pressure demand breathing apparatus, protective clothing and face mask. Wear self-contained breathing apparatus with a full facepiece operated in the positive pressure demand mode when fighting

tires.

Specific methods In the event of fire and/or explosion do not breathe fumes.

6. Accidental Release Measures

Personal precautions Wear appropriate protective equipment and clothing during clean-up. Keep upwind. Keep out of

low areas. Ventilate closed spaces before entering them. Local authorities should be advised if

2/8

significant spillages cannot be contained.

Environmental precautions Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or

onto the ground.

Methods for containmentStop the flow of material, if this is without risk. Dike the spilled material, where this is possible.

Prevent entry into waterways, sewer, basements or confined areas.

Material name: Sulfuric Acid MSDS US COV

MSDS ID: S8234 Version #: 11 Revision date: 04-19-2011

Methods for cleaning up

Large Spills: Dike far ahead of spill for later disposal. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills in original containers for re-use. Clean up in accordance with all applicable regulations. Neutralize spill area and washings with soda ash or lime. Collect in a non-combustible container for prompt disposal.

J. T. Baker NEUTRASORB® acid neutralizers are recommended for spills of this product.

7. Handling and Storage

Handling

Do not get in eyes, on skin, on clothing. Do not taste or swallow. Wash thoroughly after handling. Do not eat, drink or smoke when using the product. Use caution when combining with water; DO NOT add water to acid, ALWAYS add acid to water while stirring to prevent release of heat, steam and fumes.

Storage

Do not store in metal containers. Keep tightly closed in a dry, cool and well-ventilated place.

8. Exposure Controls / Personal Protection

Occupational exposure limits

ACGIH

Components	Туре	Value	Form	
SULFURIC ACID (7664-93-9)	TWA	0.2000 mg/m3	Thoracic fraction.	
H.C. OCHA				

U.S. - OSHA

Components	гуре	value
SULFURIC ACID (7664-93-9)	PEL	1.0000 mg/m3

Engineering controls

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Personal protective equipment

Eye / face protection Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection Wear appropriate chemical resistant clothing. Wear appropriate chemical resistant gloves.

limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Respirator type: Chemical respirator

with acid gas cartridge.

General hygeine considerations

Provide eyewash station and safety shower. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking.

Routinely wash work clothing and protective equipment to remove contaminants.

General Wear chemical protective equipment that is specifically recommended by the manufacturer.

Launder contaminated clothing before reuse.

products

decomposition.

Possibility of hazardous reactions

Hazardous polymerization does not occur.

11. Toxicological Information

Toxicological data		
Product	Test Results	
Sulfuric Acid (Mixture)	Acute Inhalation LC50 Rat: 368 mg/l estimated	
	Acute Oral LD50 Rat: 2271 mg/kg estimated	
Components	Test Results	
SULFURIC ACID (7664-93-9)	Acute Inhalation LC50 Rat: 347 mg/l 1.00 Hours	
	Acute Oral LD50 Rat: 2140 mg/kg	

Sensitization Not a skin sensitizer.

Acute effects Strongly corrosive. May cause deep tissue damage. Vapors are corrosive. After some hours,

injured persons may develop serious shortness of breath and lung edema.

Local effects Causes severe burns.

Chronic effects Corrosive. Prolonged contact causes serious tissue damage.

Carcinogenicity Contains a substance which may cause cancer by inhalation. Suspected to increase risk of

cancer.

ACGIH Carcinogens

SULFURIC ACID (CAS 7664-93-9)

A2 Suspected human carcinogen.

IARC Monographs. Overall Evaluation of Carcinogenicity

SULFURIC ACID (CAS 7664-93-9) 1 Carcinogenic to humans.

Material name: Sulfuric Acid

MSDS US COV

US NTP Report on Carcinogens: Known carcinogen

SULFURIC ACID (CAS 7664-93-9) Known carcinogen.

Skin corrosion/irritation Corrosive to skin and eyes.

Epidemiology No epidemiological data is available for this product.

Mutagenicity No data available to indicate product or any components present at greater than 0.1% are

mutagenic or genotoxic.

Neurological effects No data available for this product.

Reproductive effects Contains no ingredient listed as toxic to reproduction

Teratogenicity No data available to indicate product or any components present at greater than 0.1% may cause

birth defects.

Symptoms and target

organs

Corrosive effects.

Further information Danger of very serious irreversible effects. Symptoms may be delayed.

13. Disposal Considerations

Waste codes D002: Waste Corrosive material [pH <=2 or =>12.5, or corrosive to steel]

Disposal instructions Dispose of this material and its container to hazardous or special waste collection point.

Incinerate the material under controlled conditions in an approved incinerator. All wastes must be

handled in accordance with local, state and federal regulations.

Contaminated packaging Since emptied containers retain product residue, follow label warnings even after container is

emptied. Offer rinsed packaging material to local recycling facilities.

16. Labeling Info

Country(s) or region

Canada

Label Hazard Warning DANGER

STRONG INORGANIC ACID MISTS CONTAINING SULFURIC ACID CAN CAUSE CANCER. Risk of cancer depends on duration and level of exposure. Corrosive. Causes severe skin and eye burns. Causes digestive tract burns. Mist or vapor extremely irritating to eyes and respiratory

tract. Material reacts with water.

Label Precautions Do not breathe mist or vapor. Do not get in eyes, on skin, or on clothing. Use only with adequate

ventilation. Keep container closed. Wash thoroughly after handling. DO NOT allow water to come

into contact with this material.

Label First Aid Immediately flush eyes with plenty of water for at least 15 minutes. Immediately flush skin with

plenty of water. If gas/fume/vapor/dust/mist from the material is inhaled, remove the affected

person immediately to fresh air. Get medical attention immediately. IF SWALLOWED:

Immediately call a POISON CENTER or doctor/physician. Do not induce vomiting without advice from poison control center. If vomiting occurs, keep head low so that stomach content doesn't get

into the lungs. Do not use mouth-to-mouth method if victim ingested the substance.
